Chip, I'd like to discuss this with you and ensure I understand what EPA's position and role on this is. It's right across from OSM.

Folks,

I had a very good conversation with Keith Johnson this morning regarding this project and we agreed that a meeting will be valuable to understanding Tim's calculations. I will be forwarding Tim's calculations and write up tomorrow morning for you to review prior to the meeting. I would like to have a face-to-face meeting the 2nd week of June. Please provide me with your availability on the following dates and times by COB Wednesday May 26th:

June 10th, from 1:00-3:00.

June 11th from 1:00-3:00.

June 12th from 1:00-3:00.

I think it will be important that we have everyone at this meeting. For Jonathan and Laura, I know that travel for you will be impossible, but I would like to have you on a conference call.

I will provide conference line number and location under a separate message.

Marci
